

~~ADELINA MARS~~

RING SIZING CHART

Important

Print out this document in its true size.
Confirm that this sizing guide is accurately printed by verifying that the opposite scale measures 5 cm.

5 CM

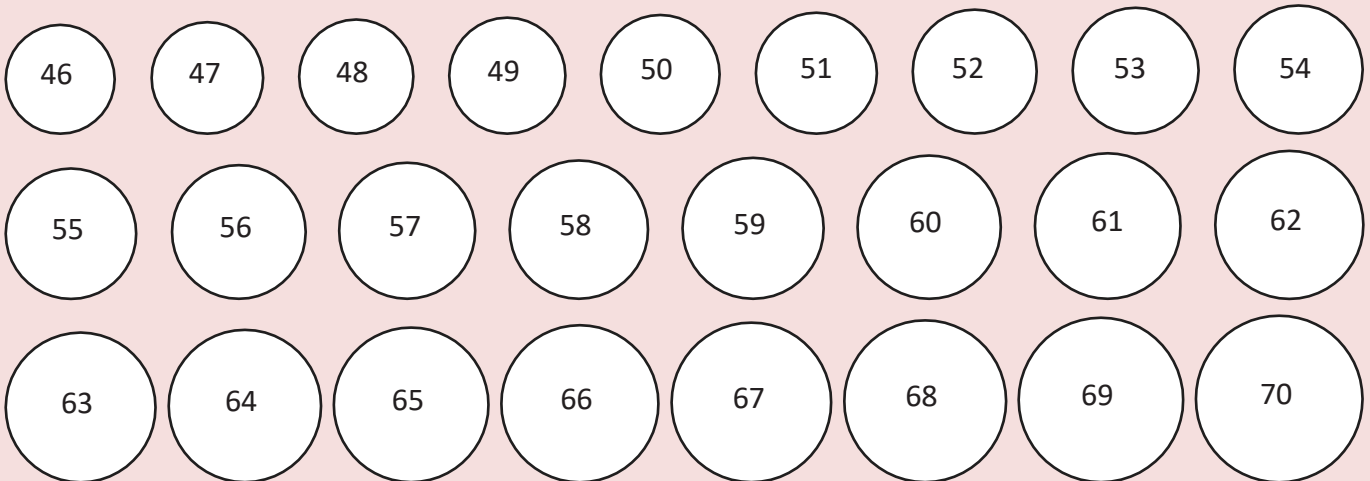

STEP 1

Take a ring that fits comfortably on the finger where you plan to wear the new ring, (a wedding ring or band, for example). Note that the size of a finger can vary from one hand to the other.

STEP 2

Put the ring on the sizing chart and align it with the circles below. The size of your finger is determined by the circle where the black line is completely inside the ring, with no red colour visible inside.

STEP 3

Note down the number in the middle of the circle and enter it on your order form in the space provided.
